## Gallery Information

DEGEN GALLERY is among the first art galleries to follow a global «pop up movement», a trend which allows businesses to add to their uniqueness by suddenly appearing in unexpected locations. At DEGEN GALLERY we represent artists of a younger generation that we promote throughout Switzerland and on an international stage. Our talents show a unique approach on combining creativity and personality with surprising results. In our changing surroundings every artwork is presented against various backdrops and offers prospective buyers a different view with every visit. The spectrum of our artists works ranges from painting to pop art, from sculpture to photography, and hasn't failed to impress art lovers all over the world.
